

NEWS RELEASE

SID2U partner Athens Technology Center to expand its market presence across the Greek and Balkan region.

Leading Greek systems integrator ATC strategically links up with SID2U for the sale of ASA – a managed service provision solution

SID2U.com, a leading provider of managed service solutions, has signed up Athens Technology Center S.A. for the sale of [ASA](#) into the Greek and Balkan market and further widen the company's European presence.

“With increasing business and technical demands placed on network managers and system administrators, we are looking to partner European and American organizations who can adapt to the demands of a network environment and support our efforts for the provision of effective managed service solutions”, said Tom Flynn, Managing Director, SID2U.com. “Athens Technology Center (ATC) fits that requirement. We are pleased to partner this highly motivated and well established Greek organization.”

[ATC](#) is part of the one the largest commercial groups in Greece, FOURLIS Group, with over 50 years of leading market experience. ATC is a systems integrator with extensive experience in integrated solutions in the financial, media, commercial and the public sectors. The company was founded in 1987 and it enhances its solution base and profile with state-of-the art products and a rich portfolio of customers in key market sectors, including most of the leading financial organizations & blue chip companies in Greece and the Balkan region.

Says Yannis Kliafas, General Manager, ATC, “We are driven to maintain a market leading position in the targeted sectors of the Greek market while extending our resources and strategy to expanding in the Balkan and greater European marketplace through joint international cooperation and new business partnerships. SID2U.com provides a top managed service product with their ASA product to meet the demand for improved IT security, deployment, compliance and network visibility with considerable ease. We look forward to working closely with SID2U.com and maintain our leading market position.

[ASA](#) is a comprehensive and centralized product for the provision of IT managed services. It is designed to ease the burden of managing a network environment, strengthen security defences, ensure regulatory compliance, ease deployment and save on time, wasted effort and reduce cost. The full range of ASA's comprehensive features includes: - software deployment, bandwidth monitoring, environment change management, asset management, patch management, software licence, ping management, backup management and many network utilities in one complete product with no add on integration cost.
