

New Emphasis buys ASA

June 12, 2008: New Emphasis, Athens, (<http://www.emphasis.gr>), a leading Greek company for Information technology and communication service provider has purchased [ASA](#) (Automated Systems Administration). According to George Sporidis, Business Director, New Emphasis, 'ASA is many critical products in one good IT managed service provision. It provides us with the necessary control to manage our network from a centralised position and we were impressed with its capability for such a low cost product. ASA helps us in many fronts. This includes monitoring the network and patches, deploying software, asset management and remote control. These are excellent features for us. Performance on our network was also good. The ASA GUI interface makes managing our network environment a lot easier'.

###
